ABOUT ME

I am a dedicated Flutter developer with a passion for building high-performance, cross-platform mobile applications. I specialize in creating efficient, scalable, and visually appealing apps, with a strong focus on UI/UX design. My goal is to bring innovative solutions to life through Flutter.

PROJECTS

Smart Home System

Jan 2024 - Nov 2024

Started learning programming through the Smart Home system project.
Developed app to control home devices remotely.
Integrated with Arduino and IoT sensors for automation.
Utilized Firebase for real-time database and authentication.
Status: Project discontinued due to funding constraints.

Salam Space

Nov 2024 - Feb 2025

A modern Flutter app designed for Muslims worldwide.
Includes live updates, Quran, Dhikr, Qibla direction, and prayer times.
Developed using Flutter and Dart with an optimized UI/UX.
Available on: Google Play | App Store
Status: Available on Google Play and the App Store.

Home Delivery App

Feb 2025 - Ongoing

Built a Flutter-based food ordering and delivery tracking system.
Designed separate apps for customers and restaurants.
Integrated Firebase and Google Maps API for real-time tracking.
Status: Under development.
